## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-43, drawn to a wide-angle lens, classified in class 359, subclass 771.
  - II. Claims 44-51, drawn to a lens system with aberration compensation, classified in class 359, subclass 656.
  - III. Claims 52-60, drawn to six-component lens system, classified in class 359, subclass 756.
  - IV. Claim 61, drawn to an aperture stop, classified in class 359, and subclass 738.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a wide angle lens doesn't require an aperture that doesn't cause the lenses to reconfigure (as in combination I) nor does the aberration lens compensation system require an aperture where the lenses don't reconfigure (as in combination II) for a changing aperture. In addition, the six-component lens system (combination III) doesn't require an aperture where the lenses aren't reconfigured for a changing aperture. The subcombination has separate utility such

as exchangeable aperture stop in variety imaging/ optical configurations with a variable number of lens element designs.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Neil Ferraro on 12/2/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
